

Emails Indicate IOSH went through the Complaint Process under their Code of Conduct finding cause to move through to a formal investigation resulting in a report containing an allegation to be put to the Ethics Complaint Review Committee see email from 23rd July. At that point the proposed meeting of that Committee did not take place and 2 months later has not been re-arranged. Emails from IOSH stressed the **strict timeline of the process....** Note the 20 days for notifying me is 10 days in the Code of Conduct as published online....

IOSH emails confirm that an allegation resulted from their investigation process which was to be put to the Ethics / Complaint Review Committee. Their decision to do that came days after I informed them of the BOHS Outcome and blatantly fake report erasing the central fact they had described as “prima facie” evidence and concluding there was no case to answer. The unexplained IOSH introduction of indefinite delay as 17.9.21 email below and cancellation of the meeting in effect destroys their “timelined” Conduct Review Process which had already taken 6 months....Note IOSH like others continue to hypocritically churn out Covid advice whilst complicit in the criminal cover –up ensuring countless thousands are denied even legal minimum ventilation.
